NFCT WHITEPAPER RAW FORMAT

Blockchains are changing the world. Although people see it only in cryptocurrencies, they see it as a financial system, but blockchains have enormous potential.

WHAT IS NFCT ?

Native Fast Cyber Trade Token in BSC. Also NFC+T. Why we use Nfc word? Please read more informaton for cyber wallet section.The cyber security area, which we know best as our team.We wanted to produce a token that is commonly accepted in this field and can be used in cyber security transactions. Cybersecurity and forensics industries are now like untouched land.Also it is also a market where very high volumes are international traded.

Companies use large chunks of their budget each year to protect against cyberbullying. Almost most companies trade internationally. Simple users when they become victims of cybercrime,they usually suffer money and moral damage and cannot solution this.

WHY ARE WE UNIQUE?

We started off by producing NFCT to easily purchase cyber security systems and services. There is no other platform in the world where you can hire ethical hackers and experts in cyber security. We promise a new ease of payment and quality service for people who need support in cybersecurity and forensic fields. We are preparing a service that will bring together victims of cybercrime and ethical hackers.

THE COST OF CYBERATTACKS TO THE WORLD

The number major attacks since 2006 (*1) it's 57 page at the moment.

And its have only cyber attacks on government agencies, defense and high tech companies, or economic crimes with losses of more than a million dollars. And consider the harms of normal users ?

The global information security market is forecast to grow at a five-year CAGR of 8.5% to reach $170.4 billion in 2022. Technology product managers will see new spending driven by regulations and increased awareness as organizations' needs evolve to address more complex threats.(*2) It is a forecast made in 2018 and we are now well above this figure.

If you want to read in detail only 2019 year Cost of Cybercrime (*3) please read this article. In summary it says 68% of business leaders feel their cybersecurity risks are increasing.

On average, only 5% of companies' folders are properly protected.(*4) On average, only 0,001% of peoples' folders are properly protected. More than 20 million cybercrime victims occurred in 2020.(*5)(*6)

Firstly

First of all, we launched our website to introduce tokens, and we wanted to show people the targets, which provide token information, set the roadmap.

NFCT works with smart contracts on the Binance chain network. All transactions record in smart contracts. Nfct doesn't use database. Also your money will not be damaged in any attack. Then we will publish our website consisting of our cyber security and computer forensics services ,our business partners.

WHAT IS THE HACKER?

Reflecting the two types of hackers, there are two definitions of the word "hacker":

Originally, hacker simply meant advanced computer technology enthusiast (both hardware and software) and adherent of programming subculture.Someone who is able to subvert computer security. If doing so for malicious purposes, the person can also be called a cracker.(*7) In short, they are people who try to damage your system, try to extort your money and effort.

WHAT IS THE ETHICAL HACKER?

A ethical hacker is an individual who uses hacking skills to identify security vulnerabilities in hardware, software or networks. However, unlike black hat hackers, white hat hackers respect the rule of law as it applies to hacking.(*8) Ethical hackers help protect you and your system from attacks. Or they try to minimize the damage caused by an attack and get back your stolen accounts.

WHAT IS THE CYBER CRIME VICTIM?

It is a person who has suffered material and moral damage.He conducted an internet search to fix his damage, to get his account back, to recover his data, to remember his password.Saw that the results he found did not work at all, and even the potential to be a victim again.

Maybe a solution has been found, but this solution requires a very high budget.He wanted to buy the solution, but the solution is not in his own country.Many of them have to make international transfers and pay high commissions.

We aim to solve his problems exactly with safety.

CYBER WALLET

There are many reliable wallet manufacturers nowadays. Most of them are really good projects.However, as everyone knows, wallets can be vulnerable to cyberbullies.or it may experience weaknesses because of the end user. You can find tons of examples on the internet about this.We started working to produce cyber wallets using our knowledge and experience in the field of cyber security.

Creating a wallet is really simple. It's not as difficult as it seems. It is not a dream to produce chrome plugin as an android application even overnight. There are dozens of open source wallet codes on the internet. (* 9) And internet has "how is the made wallet" video: D It is a well-studied wallet with all measures taken against cyberbullies and hackers, and increased verification mechanisms.A well-studied wallet with all the measures taken against

cyberbullies and hackers and increased verification mechanisms. We will hold you a little waiting to see the effect of the cyber wallet.

WHY WE USE BINANCE CHAIN NETWORK?

It takes a lot of time to build a blockchain from scratch.It slows us down to the goal we want to achieve and requires a lot of manpower.however, the binance smart chain has solved these problems.

We know what is good.BSC Network is excellent fast, low commission, very good explorer, very strong transparency.Users don't need to pay fee $ 30 for send $ 20.

BSC's superior speed and much lower transaction fees let us implement the idea to maximize the feedback loop of earning, staking.We believe the bnb network is the future of cryptocurrencies. For these reasons, we chose to be at bsc.This situation saved us from time and labor.The best has already been done. Why would we want to make a copy.

WHY 5M WALLET AİRDROP

We will popularize the cyber security by giving free admission, and by helping people understand and confide what we believe to be the future of Money . Wallet snapshots will be taken. NFCT token hodlers win nfct token.It will continue until the 5M distribution is completed.

You can sell your token whenever you want. We don't want to force people to stake.When you sell your coin in airdrop time , you don't get airdrop token.

But you can participate by purchasing again. If your airdrop tokens are not credited to your account.We are sorry for that.To fix and review this,please send your wallet adress to airdrop@nfcfastrade.com.We will respond within 24 hours at the latest, according to the time zone.

To Earn + %20 NFCT Token (What should you do ?)

If you buy the token between May 1 and May 30 and then hodl it for 2 months, your reward will be sent to your wallet in between 30 June and 30 July. You must get at least 5000 NFCT token to join.

To Earn + %15 NFCT Token (What should you do ?)

If you buy the token between June 1 and June 20 and then hodl it for 45 days, your reward will be sent to your wallet in between 15 July and 6 August. You must get at least 7500 NFCT token to join.

To Earn + %10 NFCT Token (What should you do ?)

If you buy the token between June 21 and July 21 and then hodl it for 30 days, your reward will be sent to your wallet in between 21 July and 21 August. You must get at least 10000 NFCT token to join.

We hope you will use your airdrop tokens in our services.If tokens reserved for airdrop run out in previous rounds we will inform you and we will end the airdrop.If there is any airdrop token left, we will send it to random wallets.

NFCT has locked liquidity in so there is no chance of a rugpull. And we will locked liquity in Unicrypt platform. Liquid will always be locked in this project.

TOKEN DETAILS

TOKEN NAME: NFCT

TOKEN CONTRACT (BSC) : 0xcBfcC6122f5fb79b7cF8E538Ebe09bfC129310C1

MAX SUPPLY : 80.000.000

TOKEN DISTRIBUTION

Public Sale 30%

Private Sale 12.5%

Application 5%

Research   5%

Team   12.5%

Locked   22.5%

Airdrop   6.25%

Staking   6.25%

No pre-sale . You will have almost the lowest price with airdrop.About 200.000 NFCT in circulation at the moment.(17.04.2021)

TEAM

NFCT has always locked liquidity so there is no chance of a rugpull. We are not anonymous , we must be anonymous .This may change as the project develops. We will do everything we can to prove our reliability.

We definitely don't have a rugpull chance. All of our liquid is always %100 locked.Our only goal is to adapt the blockchain technology, which we believe to be the future, to the cyber security field we know best and providing a token to be used in this industry. For this reason, we promise that we will do best.

ROADMAP

This timeline details our development goals. We will work to establish partnerships with companies that develop cyber security services and equipment at every stage of our goals.Since we are in the sector, we already have organic relationships with many of them.

- Q1 2021
  Creation of the idea of
  NFCT project

- Q2 2021
  Start the Airdrop
  Coinmarketcap and Coingecko listing request
  Pancakeswap Listing Request
  Security Audit

- Q3 2021
  New Whiteaper V.02
  Publish New Website
  (For Cyber Security and
  Rent Ethical Hacker Service)

- Q4 2021
  More Marketing Agreements for Different Mediums
  1inch Listing Request
  Start Staking for $Cyber Token

- Q1.2022
  Launch of Cyber Wallet
  First Version Released
- Q2-Q3 2022
  StableVersion
  Final Tests
